

## Clay Solvents and Smoothing Products

Sculptors often need to develop very smooth surfaces on Chavant clay models. Here are a few ideas. It is our suggestion to try

- De-Solv-it Citrus Solution ([www.orange-sol.com](http://www.orange-sol.com))
- Avon Skin-So-Soft (Bath Oil) ([www.avon.com](http://www.avon.com))

Other products that will achieve similar results are Lighter Fluid, Turpentine, Mineral Spirits and several other solvents often found in the paint departments of supply stores.
